Apply Now

To make SSR all the components are called here and id is send.

In all other sections of about we have majorly made 2 components one as the sectionNameClient (Eg. CompanyProfileClient.jsx) here we have called all the components required for that page and in their page.jsx we have called their API

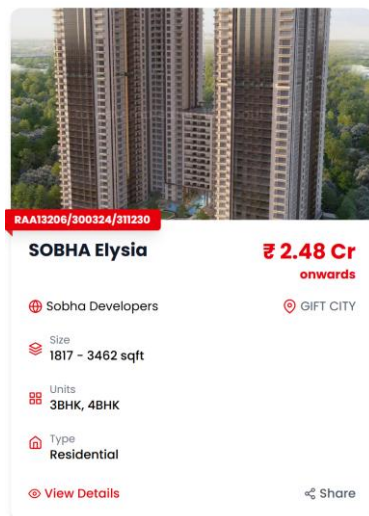

Also we have made use of dangerous HTML because in some of the input fields of admin we required to add HTML tag so to satisfy that requirement we have used it.

This same thing is done for Other tab also

Components

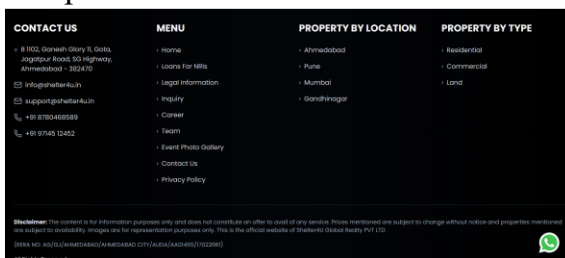

Cards.jsx

It's main card component for Recommended Projects and Similar projects

Footer.jsx

Entire footer component with API is called here so one can directly use this component

Header.jsx

Entire Header component is present also in this component we have also added mobile responsive part also

InquiryForm.jsx

This component is used only here because we also have other enquiry form component for each project also

The image displays two versions of an inquiry form. On the left is a mobile-responsive version, and on the right is a desktop version.

Mobile Version (Left):

- Title:** Inquiry
- Message:** Our expert will contact you shortly.
- Fields:** Full Name, Email, Phone (Contact Number), and Message.
- Button:** Send Inquiry

Desktop Version (Right):

- Fields:** Full Name, Email, Phone (Contact Number), and Message.
- Button:** Send Inquiry

SimilarProject.jsx

Component for SimilarProject which is displayeg below every project
